

# Instructions for the construction of Birgit Koopsens Portable Art Case

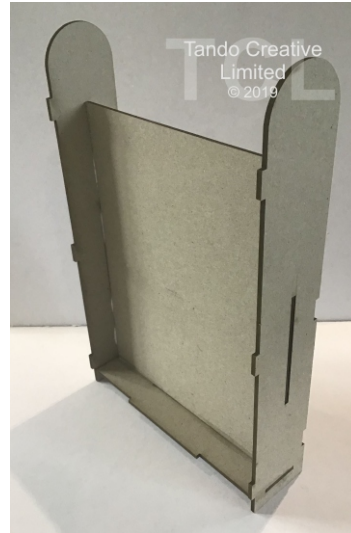

Pieces included: 2 side panels with rounded tops, 1 wrap over cover with metal clip, 1 base piece, 1 inner panel (tall) 1 front panel (short)

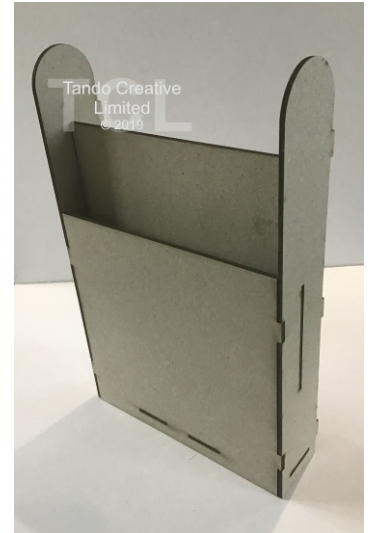

It s a good idea to do a dry run putting it together as it only fits one way.

Glue the base panel to the inner panel (tall)

Glue the two side panels in place. Please note the correct way round they should be is as per the photo. The front panel should fit on one side easily.

Glue the front panel in place

Glue the cover panel in place. Please note that the clip should be on the inside when the case is closed.
