

## TANDO CREATIVE SHRINE INSTRUCTIONS

\* Decorate all the pieces before putting together.

N.B. If you are using paper take care not to cover the tabs or they may not fit into their slits.

\* Using a strong glue and the base (not in the picture) lengthwise in front of you glue and attach the back panel inserting the notch at the bottom of the panel. Then add the sides so that their straight edges are at the top.

\* At this point add any decorations to the inside of the shrine. Attach the front arch pushing the tabs in place.

\* Glue the roof sections on so that they meet at the top, adding a little glue along the straight edges of the sides.
